Forward Deployed GenAI Engineer | Agentic Workflows | Enterprise Operations | Human-in-the-Loop Systems

<https://russelldudek.github.io/deliotte/>

## PROFESSIONAL SUMMARY

Operator-technologist and hands-on AI workflow builder who translates ambiguous business problems into visible, testable operating systems. Experience spans agentic workflows, retrieval patterns, human-in-the-loop controls, Python, SQL, JavaScript, TensorFlow,

Forward Deployed GenAI Engineer | Agentic Workflows | Enterprise Operations | Human-in-the-Loop Systems

<https://russelldudek.github.io/deliotte/>

## ADDITIONAL EXPERIENCE

### ZeusVu - Chief Pilot, Autonomous Systems

Led regulated drone operations with a 100% safety record and no FAA incidents; developed TensorFlow-based concepts for automated aerial inventory and computer-vision-enabled field intelligence.

### Cardinal Building Products - Regional Director

Built the company first remote regional operation and modernized distributed CRM, fulfillment, logistics, digital marketing, and online-buying workflows.

### Education and credentials

University of Pittsburgh - Bachelor of Science. Academic grounding includes materials science, physical chemistry, and biology-related studies.

### Credentials

Google AI Essentials | IBM Enterprise Design Thinking Practitioner | Six Sigma Certification | OSHA 10

## TOOLS AND OPERATING ENVIRONMENTS

Agentic AI | LLM workflows | RAG patterns | Human-in-the-loop design | Python | SQL | JavaScript | TensorFlow | Tableau | ERP/Odoo | Jira | Confluence | HubSpot | Slack | GIS and mapping workflows

## SELECTED OPERATING STRENGTHS

01

### Embedded delivery

Works directly across operations, engineering, customers, software-enabled systems, and field signals.

02

### High reliability

Experience spans robotics, advanced electronics, regulated drone operations, and 24/7 logistics.

03

### Technical translation

Turns technical and operating signals into priorities, standards, controls, training, and decisions.

## RELEVANT OPERATING ENVIRONMENTS

Robotics and machine vision

Advanced electronics

24/7 logistics

Regulated drone operations

ERP and CRM workflows

Agentic AI and RAG patterns

## CAREER PATTERN

Enter complex operating environments, connect technical and business signals, make the work visible, establish controls, and leave behind systems that teams can operate and improve.

### CANDIDATE THESIS

Frontier AI creates enterprise value only when the prototype becomes an owned, observable, governed operating workflow.
