Forward Deployed GenAI Engineer | Agentic Workflows | Enterprise Operations | Human-in-the-Loop Systems

<https://russelldudek.github.io/deliotte/>

PROFESSIONAL SUMMARY

Operator-technologist and hands-on AI workflow builder who translates ambiguous business problems into visible, testable operating systems. Experience spans agentic workflows, retrieval patterns, human-in-the-loop controls, Python, SQL, JavaScript, TensorFlow, robotics-enabled operations, high-reliability engineering, and enterprise process integration.

ROLE-ALIGNED CAPABILITIES

Agentic workflow design | LLM and RAG patterns | Human-in-the-loop controls | Python | SQL | JavaScript | TensorFlow | API and enterprise workflow integration | Evaluation and governance | Logging and observability | Production operating cadence | Client and stakeholder translation

Vape-Jet - Director of Operations

2025 - Present

- Leads AI-first operating transformation across production, purchasing, quality, customer success, support, engineering issue flow, ERP/Odoo, Jira, HubSpot, Slack, telemetry, and AI-assisted workflows.
- Connects factory, field, customer, and machine-fleet signals into prioritized work, earlier risk detection, cleaner handoffs, dashboards, standard work, training, and accountability.
- Works directly in a software-enabled robotics and machine-vision environment with approximately 1,000 fielded robots informing support and operating feedback loops.

DudeWorth - Founder / AI and Automation Advisor

2017 - Present

- Develops AI-readiness and opportunity frameworks that assess value, feasibility, data readiness, governance, adoption burden, reuse, and time-to-value.
- Designs agentic workflow patterns using structured context, retrieval, AI agents, human judgment, escalation, decision records, evaluation, and governance rails.
- Builds prototypes and operating mechanisms that connect AI decisions to workflow ownership, evidence, and measurable operating outcomes.

Selected technical work sample

2026

- Built a provider-neutral Python deployment-posture model that converts consequence, variability, response-time pressure, and requested autonomy into a bounded release recommendation with explicit human authority, evaluation, observability, and ownership requirements.
- Implemented the interactive JavaScript companion with scenario defaults, deterministic state transitions, accessible controls, and reduced-motion behavior.

DIRECT-EXECUTION STANDARD

Judge the work: workflow logic, technical reasoning, evaluation discipline, explicit authority, operational controls, and honest evidence boundaries.

Amazon - Operations Management / Site Leader

2014-2018

- Led launch and execution for Amazon Prime Pittsburgh in a 24/7 customer-backward environment supporting approximately five million second-day orders annually.
- Built labor planning, throughput visibility, escalation paths, standard work, and operating mechanisms across safety, quality, customer experience, and team engagement.
- Contributed to logistics innovation through Prime Air research and Amazon Flex geolocation concepts.

Compunetics - Director of Operations and Engineering Management

2000-2013

- Led engineering, manufacturing, quality, customer delivery, and complex technical programs in advanced electronics and high-reliability environments.
- Built quality systems, standard work, root-cause practices, performance measures, and process controls; collaborated with DoD, CERN, Intel, and AMD.
- Published industry articles, delivered technical talks, and participated in the HyperTransport Consortium.

ADDITIONAL EXPERIENCE

ZeusVu - Chief Pilot, Autonomous Systems

Led regulated drone operations with a 100% safety record and no FAA incidents; developed TensorFlow-based concepts for automated aerial inventory and computer-vision-enabled field intelligence.

Cardinal Building Products - Regional Director

Built the company first remote regional operation and modernized distributed CRM, fulfillment, logistics, digital marketing, and online-buying workflows.

Education and credentials

University of Pittsburgh - Bachelor of Science. Academic grounding includes materials science, physical chemistry, and biology-related fields.

Google AI Essentials | IBM Enterprise Design Thinking
